Ethnicity & Disease is an international journal that exclusively publishes information on the causal and associative relationships in the etiology of common illnesses through the study of ethnic patterns of disease. This peer-reviewed journal publishes original reports, reviews, editorials, special articles, commentaries, and letters on such topics as ethnic differentials in disease rates, the impact of migration on health status, social and ethnic factors related to health care access, and metabolic epidemiology. A major priority of the journal is to provide a forum for exchange between the United States and the developing countries of Europe, Africa, Asia, and Latin America.

Ethnicity & Disease (ISSN: 1049-510X, print) (ISSN: 1945-0826, online) is published four times a year by ISHIB. Address: 2111 Wilson Boulevard; Suite 700; Arlington, Virginia 22201.

Ethnicity & Disease is abstracted/indexed in MEDLINE/PubMed and archived in PubMed Central.

Individual subscriptions are available only as an ISHIB member; subscription is included in and is not deductible from the annual ISHIB membership dues. The annual subscription rate for institutions is $296 worldwide. Address all subscription communication to: Ethnicity & Disease Subscription Office; 250 Palm Coast Parkway NE; Suite 607, PMB 406; Palm Coast, FL 32137-8225; 386.447.2211.

Correspondence concerning advertising should be addressed to Ethnicity & Disease; 250 Palm Coast Parkway NE; Suite 607, PMB 406; Palm Coast, FL 32137-8225.

About ISHIB

ISHIB is a professional medical organization providing education, advocacy and research on high blood pressure and related risk factors in ethnic populations. ISHIB was founded in 1986 to respond to the problem of high blood pressure among ethnic groups. Today, its organizational scope includes diabetes, stroke, lipid disorders, renal disease, and other related cardiovascular risk factors. The objectives of the Society are:

- to promote public awareness of the harmful effects of hypertension and related risk factors, especially among ethnic minority populations;
- to develop health-related programs to improve the quality of life in ethnic populations worldwide;
- to educate the public on ways to prevent the complications of hypertension and other related cardiovascular diseases;
- to stimulate research and clinical investigation;
- to disseminate scientific findings to aid in the understanding of differences in hypertension and related risk factors among ethnic populations.
